SUNPARADISE COLOUR WORLD

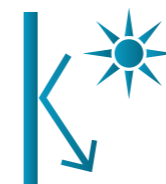

Happy people live colourful lives

Add some colour to your terrace, your summer garden or your conservatory. Chose from 15 shades in the "Trend" collection and 33 "Individual" colours, or pick a shade from the "Unique" category to bring your very own colour style to life.

Make your home a haven of colour.

Choose quality

Protect your investment

The surfaces are finished with a powder coating that is extremely sturdy and provides protection against the elements.

Lasting colours

The high-quality powder lacquers made by TIGER in combination with the modern powder coatings by Sunparadise guarantee colour-fastness and enjoyment for years to come.

Greater well-being

Boost your personal well-being by making space for the colours you love in your home's design.

Trend, Individual or Unique

Colours give our environment, such as our houses and terraces, their very own character that reflects your personal taste.

Choose your favourite shade from 48 colours in the categories "Trend" or "Individual". Sunparadise's "Unique" category lets you pick any colour of your choice. Enjoy the benefits of the high-quality, certified "TIGER Drylac®" powder coatings by TIGER Coatings, one of Europe's market leaders.

Trend (pages 6–9)

Sunparadise offers you the most fashionable colours in a large selection of 15 on trend colours.

These trendy shades are based on the colours that are currently the most popular among architects and home owners.

Individual (pages 10–12)

Our large selection of 33 colours lets you bring your own personal preferences to life.

Give your Sunparadise terrace roof or element system an even more individual touch with the colours in the "Individual" category.

Unique (page 13)

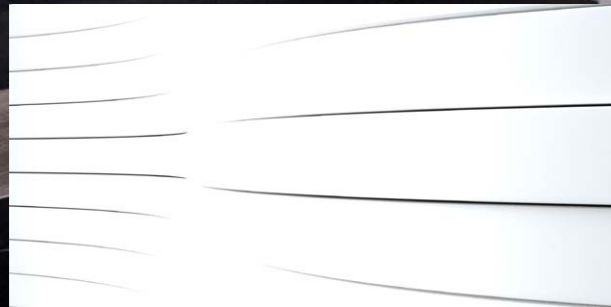

With the "Unique" category, you can pick your desired RAL or NCS colour from the colour range of a renowned powder coating manufacturer.

The "Unique" option lets your individuality run free and fulfils your every colour wish.

"Unique" – your personal colour experience

The decision is yours. Select your desired RAL or NCS colour to
suit your living space.

Turn your Sunparadise system into a unique colour experience.

Your local sales consultants will be happy to offer you a detailed
consultation.

Gloss levels

The gloss level is an essential element of any exclusive and elegant coated surface. It is defined as the quantity of light reflected by the surface.

Sunparadise's colour portfolio offers colours with the gloss levels "Semi gloss" or "Matte".

Semi gloss

A high gloss level of 65–75 in accordance with ISO 2813/60°. The light on the surface is still reflected and gives the colour a somewhat glossy appearance.

Matte

A relatively low gloss level of 20–30 GU in accordance with ISO 2813/60°. The light is not reflected as strongly from the surface, which makes the colour look matte to the eye.

Surface finish

With the high-quality "TIGER Drylac®" powder coating, Sunparadise offers attractive surface effects. In combination with the gloss level, these make up the visual impact of the colour and give your summer garden or conservatory a very unique appearance.

Metallic effects

Metallic coatings can transform the appearance of your chosen colour. To ensure long-term colour stability, only pigments with high colour-fastness and weather resistance are used.

Fine texture

Surfaces with a microstructure are a visual and tactile treat. TIGER simulates the texture "Sand", which results in extremely robust colours.

Smooth

Smooth surfaces are especially aesthetically pleasing and show the desired colour in its purest form.

Please note:

The displayed colours, gloss levels and surface finishes deviate from the original due to technical reasons when viewing online or in print. Please contact your local sales consultant to test the colour, gloss level and surface finish on an original powder-coated sample.

Your Sunparadise Specialist Partner
